*S: brought in OTC by good sam who is interested in adopting. Severely matted. Blood noted but unsure of cause*  
*O: BARH, hr 130 rr pant. h/l ok no m/a ausculted but diff to assess over panting. MM pink, crt 1 sec. Abd too large to palpated well but some degree of mass effect in cranial abdomen. heavily matted with many foxtails incisors worn. heavy tartar. Blood noted under chin but unable to assess due to matts. purulent nasal d/c noted*  
*A: 1) heavily matted 2) mass effect/enlarged abdomen r/o neoplasia (liver/spleen) vs cushings vs obesity 3) dental tartar 4) purulent nasal d/c r/o foxtails vs ITB/KC vs other 5) enlarged mass effect throat/mandibular ln r/o neoplasia vs infectious vs other*  
*P: clipped to assess dog better. Under mandible-firm swelling in area of mandibular LN on both sides with open wound with some dark blood draining between the two swellings. No obvious ft in mouth. Foxtail abscess on RF arm, many foxtails removed.*  
*PCV 50 tp 9*  
*AZO 15*  
*BG 102*  
*Dog is ate and drank. Rec maintain in treatment overnight and place under anesthesia tomorrow to assess bleeding wound if owner does not present themselves and wound is still problematic.*  
*rx clavamox 250 mg 1 po bid x 10 d*

A206574                      6/5/15                      EVALUATION

6/5/15

Develyn is a shy girl but once she warms up to you; she is a sweet heart. She loves back rubs and chasing toys. She would fit in perfectly with a one dog family looking for a loveable friend and long term companion.

A206574                      6/7/15                      BEHAVIOR

6-7-15 Sweet dog, tolerated all handling and ok with others, no food issues ks and dv

**T15-103239      01/23/2015      VET EXAM      FRACTURE      MSK**

S/O: Brought in for exam by ACO, possible fracture. Pet readily ate when offered food. GEN: QARH. T: 103.4 P:126 R: eupnic. MM- pi, slightly tacky. CRT- 1 sec. SKIN- very warm engorged MG, mild erythema to MG's bilaterally, milk expressed from MG's. Few superficial abrasions on PL's. Patchy alopecia on L+R lateral aspect of neck. MUSC- Ambulatory x 3. nwb on LPL. Abnormal abduction of L hip. Crepitus on extension and pet painful on extension of L hip. No long bone fractures palpated LPL. Crepitus on extension of R hip, pet appears more comfortable on extension of R hip. No long bone fractures palpated RPL. ABDN- Soft, non painful. Did not palpate any fetuses in uterine horns. UGR- Bladder small. Rectal- wnl. No vaginal discharge observed. Swollen vulva. Skin scrape- negative.

A:

Mild hyperthermia- R/O Pain(LPL/Pelvic fracture) vs infection (mastitis vs metritis). Recommend start oral pain medications and antibiotics and recheck temp.

LPL lameness- Suspect trauma/hbc. R/O Proximal femoral head fracture vs pelvic fracture. Crepitus on extension of R hip could include R sided pelvic fracture. Pet is eating and was able to administer oral medications. Recommend pain meds and radiographs asap to further assess limb amputation or FHO as treatment options. Pet temperment very sweet. Recommend behav eval if shelter space allows and try to pursue adoption/rescue options.

Skin abrasions- minor. Do not recommend antibiotics at this time.

Erythematous, swollen and warm MG- R/O recent partuition vs mastitis- recommend course of antibiotics at this time.

P: Clavamox, 20mg/kg, 375 mg PO BID x 10 days. Tramadol, 3.9 mg/kg, 75 mg PO BID x 10 days. Rimadyl, 2.0 mg/kg, 37.5 mg PO BID x 10 days. Recheck 1/24. MSK.

S/O: Radiographs taken today. One view available, L Lateral PL. Unable to load V/D Pelvis.

L Lateral PL: Cranial luxation of LPL at acetabular joint. Unable to determine cranial vs caudal luxation from view.

Remaining abdomen wnl.

A: L Hip luxation- Pet has dwb on LPL but does occasionally toe touch limb. Marked abduction of LPL. Recommend FHO vs limb amputation. Pet is currently nursing litter of 8 one week old puppies. Recommend delay surgical repair until puppies can be weaned, hopefully in 2-3 weeks. Pet appears comfortable on current pain medications. Recommend continue until surgery can be performed.

P: Continue pain meds at current doses. MSK.

-------------------	-------------------	--------------	--------------	------------

S/O: Radiographs repeated today. GEN: BARH. TPR- not done at this time. mm- pink, moist. CRT- 1 sec. SKIN- Patchy alopecia on ventral aspect of neck. 1.5cm raised red cutaneous mass at lateral aspect of R elbow. Mild hemorrhage associated with mass. MUSC- ambulatory x 4, marked abduction of LPL.

Sedation: Dexmedetomidine, 0.01mg/kg, 0.5mls IM. Butorphanol, 0.2mg/kg 0.5mls IM. Antiseden for reversal 0.5mls. Pulse varied between 70-90 during radiographs.

FNA of R elbow mass- round basophilic cells, no mast cells observed.

V/D Pelvis- luxated LPL. Remaining pelvis and abdominal spine appear wnl. remaining abdomen appears wnl.

L Lateral- marked abduction of LPL at stifle, unable to observe patella on lateral view. Remaining spine, abdomen wnl.

A: Luxated LPL- Recommend proceed with FHO. KM to contact Dr. Lux about scheduling surgery. Pet appears comfortable without pain medication, foster reports is doing well.

Histiocytoma R elbow- no treatment recommendations at this time- mass will regress on on with time, estimated 4-6 weeks until full regression on VIN.

P: contact Dr. Lux about FHO. MSK.

-------------------	-------------------	----------------	--------------	------------

S: recheck wounds, dog is eating but makes terrific mess and seems to struggle with swallowing food.  
 O: QARH, hr 120, rr 30 h/l ok. MM pink, crt 1 sec. Eyes-corneal edema OD with some mucoid discharge. Mucoid d/c os. Wounds noted on ventral right jaw line, oozing food materials. Healing wound over right eye.  
 A: 1) wounds on neck -- suspect communication to oral cavity 2) difficulty eating-suspect secondary to oral cavity wounds  
 P: 0.08 mL TTD IM premed. Intubated, iso, o2, pulse ox. Examination of oral cavity. large piece of food (potatoe) found in back of mouth. removed. 2 cm tear on right side of mouth between tongue and mandibular teeth. Sutured closed with 4-0 securocyl 6 interrupted sutures. 1cm tear between tongue and tonsilar crypt on right side. removed copious food particles. sutured defect with 4 interrupted sutures 4-0 securocyl. unable to determine if further tears are present behind tongue. 0.09 mL methadone IM.  
 Dog recovered uneventfully. Attempted to look in dogs ears while recovering, but dog abuptrly woke up. Rec ear exam at later time as dog may have foxtails present in ears. Dog also has ticks.  
 Comfortis today.  
 It is possible repair was not complete and may be beyond the scope of what can be done at shelter. If dog continues to have food leaking out of facial wounds, humane euthanasia would be recommended.  
 KAM

**Treatment Items this Visit:**

**T15-108527      02/23/2015      VET RECHECK      WOUND      MSK**

S/O: Recheck exam. GEN: QARH. BCS 4-5/9. Pet readily eats when offered food, dysphagic- leans head flat into water and food bowls. Doesn't appear to actually be drinking much water. Wagged tail prior to exam. T: 101.8 P:134 R: Eupnic.  
 EYES- Moderate to marked mucopurulent discharge OU. OD- 3 areas of superficial corneal defect. SKIN- food matted into haircoat on ventral cervical region and on ventral aspect of mandible. No purulent discharge observed from wounds. No food observed in wounds or extruding from wounds. Wound on R dorsal aspect of head scabbed over, no purulent discharge observed. Adult fleas observed.  
 Fluoroscein stain- OD- positive uptake, desmetocoele in two areas, area of iris prolapse at ventral cornea. OS- positive uptake in one area at medial canthus, no desmetocoele.  
 A: Dysphagia- suspect lingual avulsion based on surgery report and observing pet eating today. Treatment recommendations for lingual avulsion include pharyngostomy tube feeding for several days while avulsion heals. Risk of necrosis to tissue due to contamination of wounds observed on previous exam. Recommend continue SID SQ fluid administration for now. Pet does appear comfortable, not febrile and is getting medication- currently on liquid pain med and can switch to liquid antibiotic if necessary. Recommend continue through hold period because pet is brighter. If not substantcially improved recommend humane euthanasia.  
 Skin wounds- suspect trauma, improved, pet is acting brighter today. No active discharge observed from wounds.  
 Desmetocoele, corneal ulcer- Suspect trauma, suspect pet will likely lose OD due to iris prolapse and recommend enucleation at time of spay. Recommend continue with BNP BID and recheck fluoroscein stain in 7 days.  
 P: Continue meds at previously prescribed doses. BNP OU BID. Recheck fluoroscien stain in 7 days. MSK.

BEHAVIOR

6-15-15 Dog came in very scared, but now has come out of his shell, Tolerated all handling, and is co housed dv

---

Opie is fun, playful, and full of life. He likes to run, roll, and play with his toys. Being a young pup it is extraordinary that he rarely jumps and likes to stay low to the ground. He is a good boy ready to have some training and a person upon which to express his affection.

Date and Time: 8/2/15

History: This dog arrived on 7/14/15

Assessment: There were no behavior issues observed during this dog's initial evaluation. This dog has become increasingly stressed during her stay here at the shelter. She is now almost constantly pacing and barking. She is extremely reactive toward other dogs, barking and trying to bite the kennel door when dogs pass. She fights through the fence with the dogs on either side of her kennel.

Plan: humane euthanasia

Please use these values for outcome on kennel screen:

Outcome Type: Euth

Outcome Subtype: beh other

Outcome Condition: cage stress

Memo Completed By (initials): ks

Management Approval By (initials):pz

TIMES/DAY FOR 10.00 DAYS

---

**T15-123076 05/09/2015 XRAYs FRACTURE KAM**

*Radiographs: lat/vd pelvis. Right femoral head fractured off at neck. Left great trochanter appears fractured.  
Right paw: Oblique fracture of 5th metatarsal bone.  
Will need removal of right femoral head. will send rads to ucd if foster found for possible repair or at least opinion on whether repair warranted on greater trochanter since dog is ambulatory on that leg. Metatarsal fracture likely doesn't require repair as is non weight bearing.

How could you possibly say no to that face? Not only is she gorgeous but she has a great personality to match; she is quite the charmer. With a warm personality Terra will make a great friend for many years to come. She's gentle and not to mention she LOVES belly rubs! Lets face it she's amazing and deserves nothing more than to have YOU as a friend! So don't miss out on this wonderful individual, take her out for a walk and come say Hi!

*Dog has mammary growth and bad left eye.*

**Treatment Items this Visit:**

DHPP  
BORDETELLA

T15-127646	05/27/2015	VET EXAM	EYE	KAM
------------	------------	----------	-----	-----

*S: check eye and mammary mass*

*O: exam from cage door as dog will not allow us to approach. Weight estimated at 35#. BARH-growling and barking. OS-no globe visible. Proliferative tissue where globe should be. Some puss evident. Growth noticed at caudal left mammary region. Unsure if mammary mass vs hyperplastic tissue around nipple*

*A: 1) proliferative tissue OS-r/o ruptured globe vs neoplasia vs other 2) possible mammary mass*

*P: If owner reclaims medical care is necessary for this pet. They should follow up with their own veterinarian and animal control should make sure medical care is provided.*

*Very concerned eye could be neoplastic which would make removal and subsequent care by shelter very difficult. Humane euthanasia may need to be considered if owner does not reclaim and no rescue options found.*

*While in shelter rec antibiotics to reduce secondary infection and pain medication*

*rx cephalexin 500mg 1 po bid x 10 d*

*rx tramadol 25 mg po bid x 10 d*

KAM

**Treatment Items this Visit:**

1.00 CEPHALEXIN 500MG 2.00

Bella is playful and ready to go, she's the athletic type. Ready to run and play. Not to mention that she is also very sweet, she has a few tricks up her sleeve and knows some commands like sit! She's a bundle of joy and does well with others. You've heard enough already check her out and give her a forever home! :)

**Treatment Items this Visit:**

T15-130743	06/08/2015	VET EXAM	OTHER	MSK
------------	------------	----------	-------	-----

S/O: Flagged for exam due to possible mammary tumor. Pet had soft stool in kennel on am walkthrough. GEN: BARH.  
T:102 P:130, 2/6 systolic murmur. R: eupnic. MM- pi, moist. SKIN- 0.5x0.5cm subcutaneous mass at L lateral PL, 0.5x0.5 subcutaneous mass at L lateral TL. Abrasion at medial aspect of RTL at distal radius/ulna. 2.5^3 soft pedunculated mass at L caudal MC, second to last MG. Firm large underlying mass adjacent to MG, palpates approx 5x5cm, pet uncomfortable on palpation.

Fecal- negative.

A: MG mass- suspect neoplasia (benign vs malignant). Recommend removal if adopted at time of spay and histopath if possible.

Firm subcutaneous mass- suspect neoplasia (LSA vs other) vs trauma vs other (infectious). Recommend radiographs to further assess extent of mass if adoption or rescue interest. Pet is currently fully ambulatory. Recommend FNA while pet under sedation. Pet painful on palpation, recommend start oral pain medications.

Soft stool- R/O inflammatory (stress) vs infectious. Pet dewormed today. Recommend recheck fecal if no improvement and/or start course of metronidazole.

P: Tramadol, 3mg/kg, 75mg PO BID x 7 days. Recheck 06/12. MSK.

**Treatment Items this Visit:**

Pearlie is the perfect dose of silly and sweet. She loves to play and like most people she can also be a little clumsy. She chases after tennis balls all the while dropping them at the same time, trying her best to retrieve them. Like I said she is silly... And chances are by the end of the day Pearlle will have made a bad day into an awesome one, because this goofball will never bore you! So don't miss out on an extremely amazing girl, come laugh and play with Pearlle!

EUTHANASIA

Date and Time: 9/17/15

History: This dog arrived on 8/20/15

Assessment: There were no behavior issues observed during this dog's evaluation. She has since become very stressed in her kennel. She is now pacing and vertically jumping over and over to try to fight through the fencing with the dogs in the kennels adjoining her. She is hypersalivating and excessively panting from stress.

Plan: humane euthanasia

Please use these values for outcome on kennel screen:

Outcome Type: Euth

Outcome Subtype: time/space

Outcome Condition: normal

Memo Completed By (initials): ks

Management Approval By (initials):

 Not only is he gorgeous but he also has a wonderful personality to match. If your looking for a friend that is laid back but also has his days where he wants to play then this is your guy! He would be great for walks to the dog park because this guy is very social! He's great with other dogs and does really well on leash. So come meet Rodney today he's waiting! :)

Ike the explorer! Like most huskies this guy is friendly and would do well with a family. He's extremely intelligent and can sometimes out smart you, so think fast! He loves going for walks or runs, so if you like to exercise then this guy will be your workout buddy! Not to worry Ike also loves his downtime so sleeping indoors with the family would suit him just fine. All in all he is quite the catch! So, come meet Ike today! :)

S: brought in with injured mouth by aco

O: BARH, hr 210 rr 40 h/l ok. mm pink, crt 1 sec. Abd soft non painful, nsf. PLN ok. Amb x 4 no lameness noted. Blood from mouth. Detached gingiva by mandibular right incisors/canines. Right upper lip is caught on canine tooth

A: torn gingiva right mandible

P: removed lip from tooth. Kitten is eating well. REc monitor. Unsure if torn gingiva can be repaired as there does not appear to be any tissue to suture to. Will consult with JG

KAM

In consultation with JG no surgery necessary/possible as no spot to anchor suture. Will granulate in and kitten is already eating very well.

A228505	6/10/15	BEHAVIOR	PASS

6/10/15 Very, very sweet dog. Met four other dogs and was wonderful with all. No interest in food offered, loved all handling. Ok for adoption/rescue. ks

A228505	6/10/15	BEHAVIOR
---------	---------	----------

6-10-15 Tolerated all handling, no food issues, and good with other dogs. ks. PERFECT!!!!

A228505	6/12/15	WEB
---------	---------	-----

Upon meeting Matilda you will find that she has a very sweet and quiet nature about her. And that is infact true, shes usually pretty easy going. And how could you resist those innocent eyes? Let's face it she is just too adorable for words! She's great with other dogs and does well on leash too! She is such a breeze its almost unbelievable but that's Matilda working her magic and being extremely cute! So what more is there to say? Come meet this girl and be her friend today! :)

---------	---------	-----	--

Rachael is a good-natured girl that loves going out for walks, and enjoys spending time with someone. She does well with other dogs and can also be easy-going. Much like the usual sheperd she is curious and also confident so expect this girl to take full advantage of short trips to the park or if your the outdoorsy type I'm sure she would also enjoy exploring with you! So haven't I said enough? Come meet Rachael today! :)

SKIN- fleas, small cutaneous mass (0.5^3) at dorsal and palmar aspect at metatarsals LPL. UGR- marked soft sq mass at dorsal aspect of anus. Formed feces in colon.

A: Paresis, decreased cpl in pl's. R/O severe orthopedic disease vs trauma. Due to pet's age and inappetance prognosis is poor. Recommend monitor pet in treatment today and see if can reposition self in larger kennel and see if eating. Also recommend continue pain meds, oral. If unable to move in kennel, not eating recommend humane euthanasia at end of day. Concerned pet is suffering and has poor QOL.

UGR mass- suspect neoplasia- benign vs malignant. Would need FNA +- biopsy to pursue either removal or chemotherapy. Shelter unable to provide this service at this time.

P: Tramadol, 3mg/kg, 75mg PO BID today. Offer water and food periodically by mouth today. MSK.

Addendum: Pet showed no improvement in appetite or ambulation throughout day. Concerned about very poor qol and recommended humane euthanasia. Administered 0.5mls TTDEX for sedation IM and Fatal plus 7ml IV. Pet passed peacefully. MSK.

Please use these values for outcome on kennel screen:

Outcome Type: Euth

Outcome Subtype: Med other

Outcome Condition: Med untreatable

### Treatment Items this Visit:

T15-131691	06/12/2015	MEDICAL COMMUNICATION	WOUND	MSK
------------	------------	-----------------------	-------	-----

S/O: Pet still here, rescue hasn't pulled yet. Previously scheduled recheck. GEN: BARH. T:100.5 P:126 R: eupnic. MM- pi, moist. CRT 1 sec. MUSC- WB x 4. SKIN- Mild to moderate edema in RPL from R tarsus through metatarsals. Mild hemorrhagic discharge from wound. Appears to be draining from ventral aspect of more distal wound.

A: Skin wound- Improved. Recommend continue antibiotics and pain meds as previously prescribed. Edema likely to resolve without further intervention. Recommend haircoat adjacent to wound be cleaned and clipped as necessary during neuter and anesthesia.

P: Continue antibiotics as previously prescribed. Keep e collar on while sutures in place. Suture removal on 6/19. MSK.

**Treatment Items this Visit:**

---

**T15-133857      06/19/2015      VET RECHECK      WOUND      MSK**

S/O: Recheck exam. GEN: Very BARH. TPR- not done at this time. MM- pi, moist. CRT- 1 sec. MUSC- ambulatory x 4. SKIN- mild to moderate serosanguinous discharge at larger wound on medial aspect of RPL. One cruciate suture in place in wound, removed. Edges of wound appear opened and edges thickened, underlying tissue appears pink, healthy. Smaller wound has very small amount of purulent exudate/crusting. Remaining PE- wnl.

A: Wound- improved. Sutures either were pulled out or fell out. Tissue edges don't appear apposed. Did not replace sutures at this time, with the size of the wound would expect tissue to granulate in. Recommend continue antibiotics for additional 7 days.

Serosanguinous discharge- suspect inflammatory, expressed serosanguinous fluid from cranial aspect of larger wound, suspect small amount of dead space and seroma formation. Will likely resolve with time. Extend ns aids for 5 additional days.

P: Clavamox continued at previous dose

**Treatment Items this Visit:**

---

**T15-134858      06/22/2015      VET RECHECK      WOUND      MSK**

S/O: Recheck exam. GEN: BARH. T: Not done at this time. P: 130 R: pant. SKIN- Moderate swelling adjacent to wound on medial aspect of RPL. Improved. No discharge observed. Pet tolerated palpation of area. Marked dried hemorrhage in haircoat.

A: Wound medial RPL- improved. Pet still has one area that palpates soft like a seroma observed at last recheck but no discharge observed. Pet very BARH. Recommend monitor area for discharge, seroma mild if present and should resorb.

P: No further treatment for now, removed e collar. Recheck 06/25. MSK.

**Treatment Items this Visit:**

FRONTLINE

T15-131686      06/12/2015      VET RECHECK      WOUND      MSK

S/O: Recheck exam. Pet did not eat overnight. Drooling observed prior to exam, vomited small amount after hydro given this am. GEN: QARH. T: 100.4 P:96 R: eupnic, normal bronchovesicular lung sounds. SKIN- painful when L lateral thoracic wound palpated. Skin apposed, staples in place, mild hemorrhagic discharge observed from wound. DENT- drooling. Remaining PE- wnl.

IV LRS at 1.5 main, 38mls/ hr, start at 830am.

Thoracic wound cleaned with dilute chlorhex.

Hydro, 0.07mg/kg, 0.26mls IV at 8 am.

Cerenia, 1mg/kg, 0.7mls SQ

Famotidine, 1 mg/kg, 0.7 mls SQ BID

Cefazolin, 22mg/kg, 1.6mls IV BID.

A: Chest wound- trauma, pet inappetant, febrile. Recommend continue with supportive care, monitor vomiting. If vomiting subsides, pet eating recommend neuter and repair. Continue anti nausea, PPI as needed for inappetance. Recommend regular pain control, may consider switching back to partial mu agonist if appears sedated.

P: Hydro, 0.07mg/kg, 0.26mls IV at 8 am. .

Cerenia, 1mg/kg, 0.7mls SQ

Famotidine, 1 mg/kg, 0.7 mls SQ BID

Cefazolin, 22mg/kg, 1.6mls IV BID.

Buprenorphine , 0.02mg/kg, 0.5mls IV at 6pm.

MSK.

Addendum: Pet kept on fluids, continued to drool occasionally, no interest in food, offered canned chicken. Pet got off e collar and pulled out one staple. Applied two additional staples, closed wound. E collar replaced. Recheck exam at 445pm.

GEN: QARH. T:100 P:80 R: eupnic.

A: Chest wound- Recommend repair at time of neuter and if starts eating, drinking.

Inappetence, drooling- suspect gi vs extra gi. Could be related to pain medications, antibiotic administration. Recommend switch back to partial mu agonist for pain, continue anti nausea medications and continue IV fluids if pet is not drinking. Pet is stable, walks well and brightens up when examined, do not recommend transfer to evet at this time.

P: Continue IV fluids, cefazolin tomorrow if not eating. Recommend switch to buprenorphine, 0.02mg/kg, 0.5mls IV q 8-12hrs. MSK.

What a guy! Tabasco is one of a kind, he knows sit, stay and also fetches! What more can you look for in a friend? Not only is he smart but he's also super affectionate and eager to please, so if your looking for an all around great companion then look no further Tabasco will solve everything! :) Come meet him today and be amazed by Tabasco, he's HOT HOT HOT! :) :)

---

A228683	6/28/15	EUTHANASIA
---------	---------	------------

Date and Time: 6/28/15

History: This dog arrived on 6/10/15

Assessment: There were no behavior concerns observed during this dog's initial evaluation. Since then he has become extremely reactive toward people and other dogs. He barks, growls and lunges at animals and people through the kennel door. He is constantly fighting through the fence with the dogs in the kennels on either side of him.

Plan: humane euthanasia

Please use these values for outcome on kennel screen:

Outcome Type: Euth

Outcome Subtype: beh other

Outcome Condition: cage stress

Memo Completed By (initials): ks

06/18/15 09:47 vomit in litter area again. mh

**Treatment Items this Visit:**

T15-133538	06/18/2015	VET RECHECK	OTHER	MSK
------------	------------	-------------	-------	-----

*S/O: Recheck exam. Flagged for exam, vomitus observed in cage. Unclear which cat in litter is vomiting. This cat is housed with 3 littermates. One of the littermates has been parvo tested and came back negative. Entire litter weighed today and all weigh approx 0.5-0.55kg. Treatment sheet has BID admin for Panacur and Ponazuril- corrected on sheet. GEN: QAR. Increased skin turgor, Dehydrated 2.5%. BCS 4-5/9. T: not done at this time. P: 170 R: eupnic. MM- pi, moist CRT- 1 sec. ABDN- soft, non painful on palpation. SKIN- Diffuse flea dirt. Dried feces +/- litter in haircoat.*  
*A: Vomiting- R/O GI(infectious vs inflammatory vs systemic disease) vs Extra GI. Littermate has been parvo tested and negative. Recommend continue deworming protocol and recheck weights on 06/20.*  
*P: Continue with treatment as previously recommended. Corrected BID administration of Panacur and Ponazuril as written on posted treatment sheet. Should be SID. MSK.*

If your looking for a silly companion that always has a smile on her face then Esperanza is your girl! At first she seems calm but once she gets going theres no stopping her she's just a ball of fun waiting to entertain! She does pretty good on leash and listens pretty well! So if your looking for a goofy girl then come check her out! Don't miss out! :)

<u>Visit No</u>	<u>Date</u>	<u>Type</u>	<u>Type</u>	<u>Treated By</u>
T15-133544	06/18/2015	VET EXAM	OTHER	MSK

*S/O: Flagged for exam due to masses observed on intake. GEN: BARH. T: not done at this time. P:120 R: pant, increased bronchovesicular lung sounds. EYES- lenticular opacity OU, mild epiphora OD, remaining ocular exam WNL. EARS- moderate dark brown aural exudate. NEURO- Decreased gag reflex. MUSC- Mildly thickened L+R stifle. Mild to moderate muscle atrophy PL's. SKIN- Multiple soft sq masses. Soft 2cm^3 pedunculated mass mid radius/ulna on LTL. Overgrown nails.*

*FNA LTL mass- tntc RBC's. Occasional/rare neutrophil.*

*A: Thickened stifle, muscle atrophy - suspect OA (stifle vs hips). No gait abnormalities observed. Do not recommend treatment at this time. Pet appears comfortable. Do recommend soft bedding in kennel.*

*Pant, decreased gag reflex- Suspect laryngeal paralysis. Moderate. Kennel is air conditioned and character of panting did not increase with stress of exam.*

*Pedunculated mass LTL- open. Recommend mass be reaspirated if adopted or goes to rescue.*

*Soft sq masses- Suspect benign lipoma, too numerous to aspirate all masses today. Recommend adopter or rescue pursue diagnostics (FNA vs biopsy) if able.*

*P: Soft bedding in kennel. MSK.*

A229129 6/28/15 EUTHANASIA

Date and Time: 6/28/15

History: This dog arrived on 6/19/15

Assessment: There were no behavior concerns observed during this dog's evaluation. Since then he has become increasingly stressed in his kennel and is now reactive through the kennel door and sides toward other dogs. He tries to fight through the fence with the dogs on either side of him. He is now bloodying his mouth and muzzle grabbing the bars and chewing and pulling on them.

Plan: humane euthanasia

Please use these values for outcome on kennel screen:

Outcome Type: Euth

Outcome Subtype: beh other

Outcome Condition: cage stress

Memo Completed By (initials): ks

Management Approval By (initials):pz

TIMES/DAY FOR 5.00 DAYS

T15-138375	07/06/2015	VET RECHECK	OTHER	MSK
------------	------------	-------------	-------	-----

S/O: Recheck exam. GEN: BARH. T: not done at this time. P:120 R: eupnic, pant. mm- pi, moist. CRT- 1 sec. SKIN- Moderate serosanguinous discharge from ventral thorax/abdomen, 3x5cm area contusion with 3 areas that extend in underlying musculature. Second contused area of skin, approx 1.5x 3cm, with deeper puncture/laceration on L lateral aspect of thorax. MUSC- mild lameness on LPL. No long bone fractures palpated. Pet resists extension of L+R hips. Rectal- not performed. Remaining PE- wnl.

PCV 30% TP- 9mg/dL

BG 210

Clipped and cleaned wound with dilute chlorhex.

A: Ventral thorax contusion- suspect trauma ( road rash vs thermal burn vs other) vs toxin (spider vs other). Pet is very BARH at this time. Recommend add in oral antibiotics at this time, pet currently on 1mg/kg, of prednisone. Recommend add in oral pain meds, tramadol and e collar to prevent self trauma. Prognosis is guarded at this time, concern tissue appears compromised and may slough which would create a deficit that would be difficult to close. Pet is eating and drinking well, abscess/wound is draining. Recommend consider bandaging tomorrow at recheck if continues to drain.

Pyrexia/Hyperthermia- mild. Recommend add in oral antibiotics to treat probable secondary pyoderma.

LPL lameness- open. Recommend

P: Clavamox, 20mg/kg, 500mg PO BID x 10 days. Tramadol, 3mg/kg, 75mg PO BID x 5 days. Recheck 07/07/15. MSK.

**Treatment Items this Visit:**

---

**T15-138632      07/07/2015      VET RECHECK      WOUND      MSK**

S/O: recheck exam. Pet found laterally recumbant on am walkthrough. T was 103.5. GEN: QARH. MM- pink, slightly tacky. CRT- 1.5 sec. SKIN- Marked hemorrhagic purulent discharged from wound on ventral abdomen. Wound edges worsened since yesterday. Several areas where tissue appears edematous, discolored and likely to slough.

PCV 30%, no hemoglobinemia observed. TP- 7mg/dL.

IV Catheter, 18g.

IV bolus of LRS, 1200mls.

Pet brightened following IV fluids. Ate 1/2 can of food.

A: Skin wound- abscess. suspect toxin (spider vs snakebite) vs trauma. Pet PCV stable. Margins and discharge from wound appears larger and greater. Recommend debridement under anesthesia and closure. Place drains if possible. Prognosis is marked at this time, large wound and may make closure difficult.

P: Recheck daily and wound repair scheduled for 7/8. MSK.

**Treatment Items this Visit:**  
IV CATHETER 18G  
IV FLUIDS

---

**T15-138897      07/08/2015      SURGERY      OTHER      MSK**

O: GEN: BARH. T: not done at this time. P: 120 R: pant.

Hydromorphone, 0.1mg/kg, 1.1mls SQ. Ace, 0.04mg/kg, 0.44mls SQ.

Induction- Midazolam, 0.88mls IV. Ketamine, 1.2mls IV.

Metacam 0.1mg/kg, 0.9mls SQ.

Wound repair. Debrided wound, marked necrotic tissue. Debrided tissue margins to close defect, flused and used walking sutures with 2-0 and 3-0 securocryl. Was able to appose tissue edges in central portion of wound. Applied wet to dry bandage on cranial portion of incision to promote granulation. Marked hemorrhage during surgery with sq bleeding. Ligated and used manual pressure to stop hemorrhage. Pet recovered without incident.

Gave hydromorphone 0.05mg/kg, 0.5mls IM as PM pain med.

A: Wound- suspect toxin vs other. Wound improved. Recommend wet to dry bandage. Pet color remained wnl following surgery. Prognosis is good to guarded at this time.

P: E collar. Bandage change 07/09. Continue with meds as previously prescribed.

**Treatment Items this Visit:**

---

**T15-139171      07/09/2015      VET RECHECK      WOUND      MSK**

S/O: Recheck exam and bandage change. Bandage shifted overnight, largest area of open wound exposed. GEN: BARH. T:101.8 P:120 R: pant. MM- pale pi, moist. CRT- 2 sec. Fem pls- normal.  
 Bandage change: Cleaned open area of wound with dilute chlorhex. Removed hair from wound. Dark purple tissue adjacent to R lateral aspect of wound observed today. Decreased discharge.  
 A: Wound- improved. Concern for potentially necrotic tissue on R lateral aspect of wound. Recommend if observed tomorrow consider removing under general anesthesia.  
 P: Continue meds as previously recommended. Taper pred to 0.7mg/kg, PO SID x 3 days. Then 0.3mg/kg PO EOD x 3 doses. Continue Clavamox as previously recommended. Continue tramadol as previously recommended.

**Treatment Items this Visit:**  
 3.00 PREDNISONE 5MG 1.00  
 TIMES/DAY FOR 2.00 DAYS  
 BANDAGE CHANGE

**T15-139423      07/10/2015      VET RECHECK      WOUND      MSK**

S/O: Recheck exam and bandage change. Concerned pet not receiving medication, been finding pill pockets on floor in kennel. Shelter med staff to medicate. GEN: BARH. T: 101.9 P:100 R: eupnic. MM- pale pi, moist. CRT- 1 sec.  
 Bandage change- worsening discoloration on r lateral aspect of wound. Minimal serosanguinous discharge. Two walking sutures appear dehisced on either side of cranial closure. Mild purulent discharge from caudal portion of incision.  
 A: Wound- static. Discolored skin at R lateral aspect of wound could slough. Recommend at this time have shelter med staff medicate, continue to decrease pred and continue on antibiotics and pain meds as previously prescribed. Recommend bandage change on 07/11.  
 P: Continue meds as previously prescribed, bandage change 07/11. MSK.

**Treatment Items this Visit:**

**T15-139747      07/11/2015      VET RECHECK      WOUND      KAM**

recheck: BARH, t 103 but pet was lying in direct sun panting prior to coming to treatment trailer. Bandage change. Granulation tissue forming. Devitalized skin as before, no increase in size. Sugar bandage applied. Rec reassess on Monday. Continue meds as rx'd.  
 KAM

**Treatment Items this Visit:**

**T15-140112      07/13/2015      VET RECHECK      WOUND      MSK**

S/O: Recheck exam and bandage change. GEN: BARH. T:100.1 P:100 R: pant, eupnic. MM- pale pi, moist. CRT- 1.5 sec. SKIN-Removed bandage, small amount of tissue at R lateral margin sloughed, moderate purulent exudate at caudal portion of wound. Discolored skin at R lateral margin static. Some mild hemorrhage observed when bandage removed from central portion. Appears as if multiple walking sutures dehisced.  
 Sedation for bandage change: Dexmedetomidine, 0.01mg/kg,  
 A: Skin wound- improved. Necrotic tissue continues to slough from wound but does not appear to be extending at this time. Recommend continue with wet to dry bandaging but consider anesthetizing dog tomorrow to remove remaining necrotic tissue, flush and apply tie bandage to facilitate bandage changes.  
 P: Recheck exam 07/14/15, continue clavamox and tramadol as previously prescribed. Continue taper dose of prednisone as previously prescribed. MSK.

**Treatment Items this Visit:**

**T15-140536      07/14/2015      VET RECHECK      WOUND      MSK**

S/O: Recheck and bandage change. GEN: BARH. T:100 P:126 R: eupnic. MM- pale pi, moist. CRT- 1 sec. Bandage change: Not sedated. Took 3 people to hold today. Improved granulation bed. Tissue at R lateral margin more discolored, loosened with some tension but would have to cut to remove. Gently scrubbed wound with dilute chlorhex. Replaced wet to dry bandage.  
 A: Skin wound- improved. Recommend continue antibiotics as previously prescribed for one week and give last dose of tapered pred today. Discussed repeated wet to dry bandages with rescue and recommended bandage change q 1-2 days at this time. Otherwise pet is doing well- eating and very BAR, nice dog.  
 P: Clavamox 250mg 2 PO BID x 7 days (qty 28) (exp12/15). Pred, 7.5mg PO once. MSK.

DHPP  
BORDETELLA

T15-135635	06/26/2015	VET EXAM	OTHER	MSK
------------	------------	----------	-------	-----

S/O: Brought in by ACO, hbc. Estimate weight at 60 lbs. GEN: Quiet to mild obtundation. T: 100.8 P:160, decreased heart sounds bilaterally. R: 60-80 bpm, increased abdominal effort. MM- pale, tacky. CRT- 2 sec. Fem pls- decreased. SKIN- superficial abrasions to L+R lateral aspects of face. ABDN- tense, no fluid wave palpated. MUSC- ambulatory x 4. Hydromorphone, 0.08mg/kg, 1.2mls IM.

IV catheter

1L LRS bolus

Thoracocentesis- removed 1.5L of air. Respiratory rate down to 40bpm, no abdominal effort.

A: HBC- suspect pneumothorax, closed. Pet has improved with thoracocentesis but cannot rule out pneumothorax without radiographs. Pet appears more comfortable and color has greatly improved on LRS bolus. Recommend monitor in treatment for pain, track respiratory rate. If increases to >60 bpm recommend retap chest. Concern for tension pneumothorax or pulmonary bullae if pet continues to have increased rr following thoracocentesis. Pet would require chest tube and shelter is unable to provide this at this time, prognosis would be poor and recommend humane euthanasia if tachypnea continues beyond second chest tap.

P: Hyrdro, 0.8mg/kg, 1.2msls q 8 hrs, monitor resp rate, maintenance IV fluids/ LRS at 75mls/hr, monitor in treatment. MSK. 0500pm addendum S/O: Pet remained QAR throughout day. No interest in food. Remained on IV LRS at maintenance throughout day.

0200pm: Attempted thoracocentesis, negative pressure only. ABDN- soft abdomen, possible fluid palpated on L side of abdomen, no fluid wave.

PCV 42% TP 5mg/dL.

0500pm Cefazolin, 20mg/kg, 3.0mls IV.

A: Tachypnea- suspect secondary to opioid administration vs pneumothorax vs diaphragmatic hernia. Recommend radiographs of thorax and abdomen and continue pain medication administration. If tachypnea improves and pet stable can try on partial mu agonist, inappetance may be secondary to mu agonist.

Skin wounds- suspect trauma, recommend continue IV antibiotics until pet can eat on own. Then switch to cephalexin, 20-30mg/kg BID.

P: Transfer to evet. MSK.

**Treatment Items this Visit:**

IV CATHETER  
IV FLUIDS

**T15-136379      06/29/2015      VET RECHECK      OTHER      MSK**

S/O: Transfer from evet. Pet remained tachypnic on exertion, walks o/s, but eupnic at rest. Radiographs performed showed pneumothorax, worse on L side and possible hemoabdomen. 3 views available. Appetite improved, stopped IV fluids and switched to oral pain meds. GEN: QARH. T: not done at this time. P:100 R:50bpm. MM- pi, moist CRT- 1 sec. NOSE- no epistaxis observed. SKIN- no hemorrhage observed from skin wounds.

A: Pneumothorax- improving. Recommend continue with oral pain meds and recheck rr daily.

Possible hemoabdomen- PCV on Friday was mildly hemoconcentrated following fluids- recommend repeat PCV if mm appear pale, indication that pet may be anemic.

Skin wounds- improving. Recommend continue with antibiotics as previously prescribed.

P: Cephalexin, 26mg/kg, 750mg PO BID x 10 days. Tramadol, 3.5mg/kg, 100mg PO BID x 10 days. Recheck 06/30/15. MSK.

**Treatment Items this Visit:**

**T15-136911      07/01/2015      VET RECHECK      OTHER      MSK**

S/O: Recheck exam. GEN: BARH. T: not done at this time. P:120 R:40 bpm, eupnic SKIN- wounds on L+R dorsal aspect of head- improving, no discharge observed. Remaining exam wnl.

A: Pneumothorax- improved/ resolved. Recommend recheck in 5 days and once meds are finished to re evaluate pet but is markedly improved. Eating well and much brighter.

Skin wounds- improved. Recommend continue antibiotics as previously prescribed.

P: Recheck 07/06. Continue meds as prescribed. MSK.

Date and Time: 06/26/15, 11am

History:S/O: Transfer from evet, attacked by two dogs. Pet developed diarrhea, hematuria during my examination, parvo tested positive. GEN: Obtunded. T: not done at this time. P:160 R:56, increased abdominal effort. SKIN- sq emphysema, contusion to R lateral chest with a superficial contusion, no open thoracic wound. Palpable rib fractures from T7 to T4. DENT- adult incisors present, adult canines starting to erupt- age approx 5-6 months. UGR- male, intact.

IV catheter

IV fluids- bolus 250 mls LRS

Methadone, 0.2mg/kg, 0.2mls

Acepromazine, 0.04mg/kg, 0.2mls

Parvo- positive

A: Parvo positive- recommend humane euthanasia at this time. Pet has rib fractures and would require ICU monitoring, possible O2 cage and appears markedly debilitated by parvo at current time. Dehydration is marked to moderate and concerned pet is suffering, prognosis is guarded to grave.

P: Fatal plus, 2.5mls IV. Evet alerted to parvo status. MSK.

Please use these values for outcome on kennel screen:

Outcome Type: Euth

Outcome Subtype: Med infec

Outcome Condition: Med untreatable

Memo Completed By (initials): msk

Management Approval By (initials): msk

<b>T15-156680</b>	<b>09/23/2015</b>	<b>VET EXAM</b>	<b>EAR</b>	<b>MSK</b>
-------------------	-------------------	-----------------	------------	------------

S/O: Pet returned again due to ear hematoma. Adopters unable to afford vet care, surrendered dog to shelter but would be willing to take back if treated. GEN: BARH. T:101.1 P:130 R: eupnic. MM- pi,moist. CRT- 1 sec. BCS 6/9. SKIN- marked urticaria and erythema on ventral abdomen and face. Moderate facial edema, very pruritic on face. EARS- Drain in place AD. Open draining incision, drain missing from AS.Mild hemorrhagic discharge AU. TM intact AU. Mild dark brown exudate AU. Skin scrape - negative.

Dexmedetomidine, 0.01mg/kg, 0.4mls IM Butorphanol 0.3mg/kg, 0.6mls IM

Dexamethasone SP, 0.15mg/kg, 1.0ml IM

Diphenhydramine 2.5mg/kg, 1.0ml SQ

Cleaned ears and removed drain from AD.

A: Urticaria, facial edema and pruritis- suspect mild anaphylaxis (Cephalexin administration) vs inflammatory (FAD vs atopy vs CAFR). Administered steroid today. Pet on rimadyl and cephalixin, d/c both and start gi protectants.

Aural hematoma- Greatly improved. Some discharge AU but do not recommend replacing drain at this time, should heal with time.

P: Sent with adopters: Sucralfate 1gm Dissolve one tablet in 10 mls of water. Give slurry by mouth twice a day approximately 30 min to one hour before offering other medications or food. (10 tablets)(Exp 9/16).

------------	------------	----------	-------	-----

S/O: Transfer from evet. Pet had skin wounds, hot spot at tail base. Started on cephalixin, carprofen. GEN: BARH. T:102.6 P:160 R: pant. MM- pale pi, moist. CRT- 2 sec. SKIN- two wounds on R lateral PL, one at hock and other mid femur. Mild serosanguinous discharge at both wounds. Marked ecchymoses/contusion on medial aspect of LPL. MUSC- pet ambulatory x 4 but painful on abduction of RPL.

PCV 34% TP-8 mg/dL

A: RPL skin wounds, painful on abduction of RPL, LPL contusion- suspect trauma (HBC vs other). Recommend continue with pain meds and antibiotics. If pet continues to be painful in R hip on recheck consider rads to rule out pelvic fxr.

Hot spot- suspect secondary to FAD. Recommend topical flea preventative today. Recommend continue antibiotics as previously prescribed and e collar.

P: Cephalexin, 20 mg/kg, 750 mg PO BID x 10 days. Tramadol, 3mg/kg, 100mg PO BID x 7 days. Rimadyl, 2 mg/kg, 50mg PO BID x 5 days. Recheck 07/03. MSK.

## Memos Attached to Animal - From Memo Screen

<u>Memo id</u>	<u>Memo Date</u>	<u>Memo Type</u>	<u>Memo Subtype</u>
A229464	7/5/15	EUTHANASIA	

Date and Time: 7/5/15

History: This dog arrived on 6/29/15

Assessment: When I stood in front of this dog's kennel he stood at the door growling at me while maintaining a direct stare. I put my foot against the bottom of the kennel door and opened the door slightly and the dog barked and lunged at me while growling.

Plan: humane euthanasia

Please use these values for outcome on kennel screen:

Outcome Type: Euth

Outcome Subtype: beh agg

Outcome Condition: people agg

Memo Completed By (initials): ks

Management Approval By (initials):pz

<u>T15-136362</u>	<u>06/29/2015</u>	<u>VET EXAM</u>	<u>OTHER</u>	<u>MSK</u>
-------------------	-------------------	-----------------	--------------	------------

*S/O: Brought back for exam due to rash on ears and mouth. GEN: QARH. T:98.9 P:200 R: eupnic. MM- pi, moist CRT- 1 sec. DENT- juvenile dentition present. EARS- Marked serosanguinous exudate on ventral aspect of pinnae AU. Pet painful on exam of ears, TM not observed AU. SKIN- pustules, serosanguinous exudate at rostral muzzle. LN- enlarged submandibular lymph nodes bilaterally. Remaining exam- wnl.*

*Ear cytology- marked to severe mixed inflammation. 2-3+ rods and cocci.*

*A: Mandibular lymphadenopathy, aural and rostral muzzle pustules- suspect inflammatory (puppy strangles vs OE vs allergic). Recommend start on 2 week tapering course of prednisone and antibiotics due to observed pyoderma. Concerned about efficacy of vaccination if pet is on immunosuppressive dose of steroids, recommend find foster/rescue asap.*

*P: DHPP, BORD, Pyrantel. Prednisone, 1 mg/kg, PO BID x 7 days. Then decrease to 1mg/kg, PO SID x 7 days. Then 1mg/kg PO EOD x 7 days. Clavamox, 15mg/kg, 0.3mls PO BID x 10 days. Recheck in one week, 07/06/15. MSK.*

S/O: Recheck exam. Pet eating chicken very well. GEN: QARH. T: not done at this time. P:100 R: eupnic. MM- pi, moist CRT- 1.5 sec. MUSC- non ambulatory but can reposition self in kennel. Paretic. Toes obs and do not appear swollen, warm to touch.

Meloxicam, 0.2mg/kg, 0.3mls PO once, loading dose.

A: Degloved PL's - recommend bandage change tomorrow. Blood supply to limbs appears intact, recommend PL's be re bandaged tomorrow.

P: Recheck and bandage change 07/02. MSK.

### Treatment Items this Visit:

10/01/2015

---

**T15-137461      07/02/2015      VET RECHECK      FRACTURE      MSK**

S/O: Bandage change. Sedated for bandage change. GEN: BARH. T:102.3 P:200 R: eupnic. MM- pi,moist. CRT- 1 sec. Dexmedetomidine, 0.01mg/kg, 0.06mls IM. Butorphanol, 0.3mg/kg, 0.07mls. IM. Antisedan, 0.04mls IM.  
Bandage change: Removed wet to dry bandages. Granulation tissue observed on all pelvic limb wounds, gentle scrub with dilute chlohex and reapplied wet to dry bandages.  
A: Degloving injury- recommend continue with antibiotics at current dose. Recommend d/c tramadol, difficult to administer proper dose due to pet's weight. Recommend switch to buprenorphine sq BID. Recommend next bandage change 7/4.  
P: Continue with clavamox at current dose. Start buprenorphine, 0.03mg/kg, 0.2mls SC BID x 5 days. Metacam, 0.1mg/kg, 0.15mls PO SID x 7 days. MSK.

**Treatment Items this Visit:**  
0.20 BUPRENORPHINE 2.00  
TIMES/DAY FOR 5.00 DAYS  
0.15 METACAM ORAL SUSPENSTION  
1.00 TIMES/DAY FOR 7.00 DAYS

---

**T15-137558      07/03/2015      XRAYS      FRACTURE      MSK**

S/O: Pet ate well overnight. Urinated in kennel, no bm. Pet vomited after sedation, had diarrhea. GEN: QARH. T:103.2 P:160 R:eupnic. MM- pi, moist. CRT- 1 sec. MUSC- toes warm to touch, mild interdigital swelling RPL. Will bare weight on R side with bandage on but not left.  
Sedation: Dexmedetomidine, 0.01mg/kg, 0.04mls IM. Butorphanol, 0.2mg/kg, 0.04mls. Antisedan, 0.04mls.  
Parvo- negative  
Radiographs.  
VD Pelvis: L: SI luxation, acetabular and pubic fracture. Ishcium symphysis fracture. R metatarsal fracure D5 and possible lateral displacement of D4 metatarsal. Abdominal spine wnl. Abdomen- marked feces in colon.  
A: L acetabular fracture, hind limb paresis- pet will most likley require FHO based on fracture and non weight bearing on L limb. Suspect some degree of paresis related to bandage on PL's. If granulation beds appear improved on R proximal limb consider restricting bandage to distal extremity.  
Vomiting, diarrhea- R/O Gi inflammatory vs infectious vs systemic disease. Pet vomited yesterday following sedation for bandage change. Pet is eating well in shelter currently. Recommend monitor today and if vomiting/diarrhea continues recommend obtain fecal, consider gi protectants and d/c nsaid administration.  
Degloving injury- static. Pet scheduled for bandage change 07/4. Consider leaving bandage off if possible to better evaluate voluntary movement in PL's.  
P: Continue w/previous antibiotics and pain meds as prescribed. MSK.

**Treatment Items this Visit:**

---

**T15-138403      07/03/2015      VET RECHECK      FRACTURE      MSK**

S/O: Bandage change. Sedated.  
Dexmedetomidine, 0.01mg/kg, 0.05mls. IM.  
Bandage change- RTL- area of black tissue at fractured metatarsal. Remaining tissue appears healing. Repeated bandage, did sugar bandage and limited bandage to distal extremity.  
LTL- good granulation bed observed on all wounds. Repeated wet to dry bandage.  
P: Recheck on 7/6, repeat bandage. MSK.

**Treatment Items this Visit:**

---

**T15-138404      07/06/2015      VET RECHECK      OTHER      MSK**

S/O: Fostered over weekend. Pet did well. Observed purulent discharge from bandage on RPL.  
Sedation: TTDEX, 0.04mls. Intubated and maintained on 1.5-2% iso and O2.  
Bandage change:  
LPL- Good granulation bed present on all wounds. Area of thickened black skin on distal lateral aspect wound, removed. All wounds cleaned with dilute chlorhex. Apposed skin on larger wound on medial aspect of LPL with one cruciate and one simple interrupted suture, used 3-0 securocryl. Unable to completely close wound.  
RPL- Moderate to marked mucopurulent discharge from wound on distal limb at fractured metatarsal D5. Cleaned wounds with dilute chlorhex and reapplied sugar bandage and wrapped foot.  
A: Wounds- improving. Recommend continue with pain meds, antibiotics at current doses. Concerned about purulent discharge observed on RPL, concerned foot may slough but does appear improved today. Pet is eating well and BARH. Recommend bandage change on 07/8.  
Pelvic fracture, L acetabular fracture- static. Pet is defecating.  
P: Continue meds at previously prescribed doses. MSK.

**Treatment Items this Visit:**

**T15-138896      07/08/2015      VET RECHECK      FRACTURE      MSK**

*S/O: Recheck exam and bandage change. Pet weight bearing for short periods on PL's but will walk on front limbs. GEN: BARH. T:100 R: eupnic. MM- pi, moist. CRT- 1 sec.*

*Sedation: Dexmedetomidine- 0.01mg/kg, 0.04mls IM. Butorphanol, 0.2mg/kg, 0.04mls IM. Antisedan, 0.04mls.*

*Bandage change- RPL: Improved granulation bed. Dark/black tissue was not observed at fractured metatarsal today.*

*Repeated sugar bandage on RPL. LPL- Improved granulation bed. Repeated wet to dry.*

*A: Open fracture RPL- improved. Recommend continue bandage until can get tissue covering fractured bone. Consider repeating wet to dry if improved on next change.*

*LPL acetabular fracture- Pet appears comfortable on pain meds being prescribed. Eating well. Concerned pet has not defecated since weekend and so d/c buprenorphine. Contact UCD for possibility of FHO of limb.*

*P: Continue with meds as previously prescribed. Bandage change 07/10. MSK.*

**Treatment Items this Visit:**

**T15-139437      07/10/2015      VET RECHECK      FRACTURE      MSK**

*S/O: Bandage change. GEN: BARH. TP- not done at this time. R: eupnic. MUSC- Pet putting weight on PL's while standing but will continue to walk on front legs.*

*Bandage change- RPL- improved granulation tissue. LPL- 5th metatarsal still observed but tissue appears healthier, milder purulent discharge around open wound.*

*A: Degloved LPL, Open fracture RPL- improved. Recommend continue sugar bandage and change q 2 days.*

*LPL acetabular fracture- static. Contacted UCD about repair. Awaiting response.*

*P: Continue with metacam and clavamox at previously prescribed doses. Bandage change 07/13. MSK.*

**Treatment Items this Visit:**

**T15-140281      07/13/2015      VET RECHECK      FRACTURE      MSK**

*S/O: Bandage change. Pet eating well, normal bm and appears comfortable. GEN: BARH. T: not done at this time. P: 120 R: eupnic. MM- pi, moist. CRT- 1 sec.*

*Bandage change- RPL- small area of discoloration caudal to open fracture, improved granulation tissue, bone still observed. Repeated sugar bandage. LPL- Improved granulation bed over all wounds. Removed remaining cruciate suture from medial aspect of LPL.*

*A: Degloving- improving. Recommend continue with sugar bandage on RPL until tissue covers open fracture.*

*Pelvic fracture- static. Pet still using front limbs to walk.*

*P: Continue clavamox, 15mg/kg, 31.25 mg PO BID x 10 days. Continue metacam as previously prescribed. MSK.*

**Treatment Items this Visit:**

0.50 CLAVAMOX 62.5 2.00 TIMES/DAY  
FOR 10.00 DAYS  
0.15 METACAM ORAL SUSPENSTION  
1.00 TIMES/DAY FOR 7.00 DAYS

**T15-141047      07/15/2015      VET RECHECK      FRACTURE      MSK**

*S/O: Bandage change. GEN: BARH. TPR- not done at this time. MM- pi, moist. CRT- 1 sec.*

*Bandage change- RPL- greatly improved, granulation tissue present. Left bandage off.*

*LPL- bone still exposed but granulation bed improved, discolored area adjacent to bone fragment decreased. Repeated sugar bandage.*

*P: Bandage change on 07/17/15. Continue with meds as previously prescribed. MSK.*

**Treatment Items this Visit:**

**T15-141465      07/17/2015      VET RECHECK      NORMAL      MSK**

S/O: Bandage change. GEN: BARH. T: not done at this time. P:160 R: eupnic. MM- pi,moist. CRT- 1 sec. DENT- erupting adult incisors, maxillary and mandibular. SKIN-RPL- improved, skin appears mildly contracted but healthy granulation tissue present. LPL- improved granulation tissue adjacent to open fracture, discoloration improved, resolving. Re applied sugar bandage.

UGR- tapeworm segment.

A: Open fracture- improving. Recommend continuing sugar bandage until tissue present over fracture and epithelialization starts to occur. Recommend finishing out antibiotics but do not recommend extending.

Pelvic/L acetabular fracture- static. Pet intermittently puts weight on PL's when standing but continues to walk on front limbs. Pet was accepted into UCD community surgery on 8/12. Recommend finish out metacam and assess pet for pain without meds before extending.

P: Continue meds as previously prescribed, bandage change 07/20/15.

**Treatment Items this Visit:** DEWORMING DRONCIT

**Treatment Items this Visit:** DHPP

---

**T15-142128 07/20/2015 VET RECHECK FRACTURE MSK**

S/O: Bandage change. PE- BARH. wnl.

Bandage change on RPL only. Granulation tissue improved, bleeding at open fracture observed. No discoloration observed today. Repeated sugar bandage.

P: continue with antibiotics and pain meds as previously prescribed. Do not recommend refilling antibiotics when finished. Bandage change 07/22. MSK.

**Treatment Items this Visit:**

---

**T15-143091 07/22/2015 VET RECHECK FRACTURE MSK**

S/O: Bandage change. Intermittent weight bearing on PL's when standing, continues to walk on front limbs. GEN: Very BARH. TPR- not done at this time. MM- pi,moist. CRT- 1 sec. PE- static.

Bandage change: RPL- Improved granulation bed. Fractured metacarpal still visible. No discolored tissue observed. Gentle scrub with dilute chlorhex and repeated sugar bandage.

P: Bandage change 07/24. Do not recommend continuing clavamox and metacam at this time. Reassess comfort at next bandage change. MSK.

**Treatment Items this Visit:**

---

**T15-143417 07/24/2015 VET RECHECK FRACTURE MSK**

S/O: Bandage change. GEN: BARH. TPR- not done at this time. MM- pi, moist. CRT- 1 sec.

Bandage change RPL- Granulation tissue present over fractured 5th metatarsal. Gentle scrub with dilute chlorhex and repeated sugar bandage.

A: Wound- improved. Recommend continue with sugar bandage until epithelialization occurs over wound.

P: Bandage change 07/27. MSK.

**Treatment Items this Visit:**

---

**T15-143931 07/27/2015 VET RECHECK FRACTURE MSK**

S/O: Bandage change. GEN: BARH. TP- not done at this time. MM- pi,moist. CRT- 1 sec. MUSC- weight bearing on both PL's when allowed to walk around the room.

Bandage change: RPL- improved granulation bed over open fracture but still visible. Gentle scrub with dilute chlorhex and repeated sugar bandage.

P: Bandage change 07/29. Discussed finding foster for pet with PZ and recommended. MSK.

**Treatment Items this Visit:**

---

**T15-144346 07/29/2015 VET RECHECK FRACTURE MSK**

S/O: Bandage change. Pet developed soft stool, mucus and small amount of blood in stool. Pet runs on front limbs but will bear weight on PL's when standing. GEN: BARH. T: not done at this time. P: not done at this time. R: Eupnic. MM- pi, moist. CRT- 1 sec. UGR- small amount of dried feces in adjacent haircoat. Remaining PE- wnl.

Fecal- negative.

Bandage change RPL- improved granulation bed over fracture, not visible today. No discoloration observed in wound.

Repeated sugar bandage.

A: Open fracture- improved granulation bed over fracture.

L Acetabular fracture- pet is bearing weight in both PL's for short periods of time. Likely to improve with time. Pursuing FHO at this time may not be warranted and pet has rescue interest. Not having FHO may predispose pet to OA when older but repair at this time may exacerbate injury to sacral and hip neurovascular structures. Do not recommend FHO at this time.

P: Bandage change on 07/31. MSK.

**Treatment Items this Visit:**

S: Return from UCD. Pet had repeat rads and recommendation per Orthopedic service was that FHO was not indicated based on recent rads. Per their rads Tommy has multiple fractures to pelvis: pubic symphysis, body of the pubis and ilial wing. No acetabular, femoral neck or head fractures were observed. Recommended continue cage rest, ideal period is 8-12 weeks from time of injury. Rest is to include no running, jumping or off leash play. Recommended Tommy be monitored for trouble defecating, urinating or seems very painful a recheck with a veterinarian is warranted. MSK.

S: Vet check kitten with diarrhea.

O: BARH, diarrhea seen in cage.

A: Kitten with diarrhea - Ddx: Infectious - including viral such as panleukopenia, parasitism, vs diet change, stress, or other (such as metabolic, endocrine, neoplasia, open).

P: Per protocol for kitten diarrhea:

RX: Metronidazole 15 mg/kg PO BID x 7 days

RX: Fenbendazole 50 mg/kg PO SID x 5 days

RX: Ponazuril 50 mg/kg PO SID x 3 days

Consider subcutaneous fluids (LRS or similar) 20 mls/kg/day

Consider Tylosin and/or Fortiflora if not resolving.
